Infolet Sp. z o.o.

ul. Miłkowskiego 3/302

30-349 Kraków

We started our cooperation with Infolet in December 2011. During the first stage of collaboration we have adopted a build-operate-transfer model offered by Infolet, which covered all the support needed for moving of part of our business to Poland and setting new department there. The spectrum of the tasks involved finding suitable office space, organisation and furnishing, ordering all necessary devices required for proper functioning of the office, ensuring Internet connection and many more.

In the next stage, we have commissioned Infolet to recruit and employ a team of developers that would take up development and maintenance tasks on company's current projects. All staff members have been employed as contractors in Infolet and outsourced to work for Idium. Both sides agreed on probation time, after which contractors could be hired directly and permanently by Idium.

Infolet fulfilled all the obligations under the signed contract. Our new Polish department was ready to operate in very short time and efficiently. As for employed IT specialist, they proved to be a valid and solid core of Idium Polish team.

It is the quality, punctuality and flexibility towards client's needs that distinguish all services provided by Infolet. We could recommend Infolet as a solid and reliable business partner.

Henning Edwardsen, CEO at Idium AS
